THE POTATO BEETLE.

We gave a very full description of the Colorado potato beetle last year and predicthas come true. If not already spread surest and safest remedy. A correspondent -[ED. throughout our borders, it bids fair to reach of the New York Tribune says: "From June every corner before the season is through. 7th to August 17th, I have caught and

the neighboring patches, and now come in 1824. He found it abundant on the Upper Missouri, at that date, and it has since spread from its natural habitat, the plains of Dakota, Western Nebraska and Kansas, Colorado, and, perhaps, the Western portion of India Territory and Texas. We have seen it on the wild potato plant, the Sola-seen it on the wild potato plant it is not what we are called upon to show; but rather we are to show the suit-solated paragraph in the next issue of the Plough-baragraph in the next issue num rostratum, in Colorado and Wyoming, If this precaution is neglected the use of The cause of the "blight" to which you valleys of the Saco and the Piscataqua and and other sections of the West which we Paris green is the next best thing. Dissolve refer is still shrouded in mystery. It appears the St. Croix. In all the length and breadth visited in 1875, though we had previously become familiar with its appearance and babis in Wissanian bear and localities. In 1828, 1829 and 1830 it was so the Penobscot valleys, amid the green hills become familiar with its appearance and habits in Wisconsin, where, in 1869, we saw it in countless myriads. We have not space to follow in detail all the steps of its migrations from the Rocky Mountains eastward though the history of the successive invalue.

It does not readily general as to cause great alarm, and though there are still every year more or less cases, it is true that some years it is vastly worse than others. At the time it created such exhaust of several experiments this year that have been successful. ley and of the wooded district of the Middle and North-Eastern States, until only the AGRICULTURAL COLLEGE GRAD-

caster County, Pa., and Cattaraugus small and the bugs few, hand-picking may County, New York; and in 1873, it had pushed to the extreme Eastern limit of that this there is no hope except in Paris green. But Mr. S. Dana Hayes, State Assayer of mave been seen in the District of Columbia. In 1874, it became well established in Connecticut, New Jersey, New York, Pennsylvania, Delaware, Maryland, and Virginia. We had it that year also in various parts of Massachusetts, as at Williamstown and other the subjection, but beyond brief, the latter resemble the common are the Ascarides and Lumbricit, the latter resemble the common earth-worm in size and shape. The Ascarides are small, white worms, which usually infest the part of the United States. Only one-half of worm his horse is affected with, nor the rectum. "Reader" does not state the kind of worm his horse is affected with, nor the remedies he has used. It is often a difficult matter to expel them, sometimes one remedy will succeed best, sometimes another. One drachm of calomel given in the animal's policy rivers as may be seen by a clarge at the post of the common are the Ascarides and Lumbricit, the latter resemble the common earth-worm in size and shape. The Ascarides are small, white worms, which usually infest the part of the United States. Only one-half the extreme northeast part of the United States is settled as yet, a dense lumber of worm his horse is affected with, nor the rectum. "Reader" does not state the kind of worm his horse is affected with, nor the rectum. "Reader" does not state the kind of worm his horse is affected with, nor the rectum. "Reader" does not state the kind of worm his horse is affected with, nor the rectum. "Reader" does not state the kind of worm his horse is affected with, nor the rectum. "Reader" does not state the kind of worm his horse is affected with, nor the rectum. "Reader" does not state the kind of worm his horse is affected with, nor the rectum. "Reader" does not state the kind of worm his horse is affected with, nor th

It appears from these facts that its progress has been steady and uniform. In 1866, Mr. Walsh, a competent entomologist predicted that it would reach Maine in ten years. His prediction was literally verified.

As to the habits of the beetle they are the same here as at the West where they have been very closely studied for a dozen years and more. Having wintered a few inches and more. Having wintered a few inches above the surface of the ground, it appears above the surface before the potato plants come up early in May, and feeds on the young shoots, and by the time the leaves are expanded, lays its eggs on the under-side of the leaf in clusters of from thirty to forty, side by side, the eggs are oval-cylindrical, and orange-red in color. "From an equal number of males in the summer of males and more of the ground and rather wet thought there is a fine opportunity to drain; about an acre is under a thick growth of brush, and another acre is composed of the world and rather wet though there is a fine opportunity to drain; about an acre is under a thick growth of brush, and another acre is composed of the world and has numerous connecting or allowed by a crop of land coutaining about five cover and a wire gause bottom, and shandle three feet long is a convenient one to shake it from the vines. Two or three applications during the summer ought to be sufficient.

Paris green to twenty or thirty parts of plaster, or ashes, one part of Paris green to twenty or thirty parts of plaster by measure. A box with a tight cover and a wire gause bottom, and shandle three feet long is a convenient one to shake three feet long is a convenient one to shake three feet long is a convenient one to shake three feet long is a convenient one to shake three feet long is a convenient one to shake three feet long is a convenient one to shake three feet long is a convenient one to shake three feet long is a convenient one to shake three feet long is a convenient one to shake three feet long is a convenient one to shake three feet long is amount of hay; etc.

Allow me to ask, by what process seawed of fin season to follow it with turnips, unless you cut it green for fodder. If sown now it to prove it.

Maine lies within the best portion of the interpretation of the interpretation of the proposed process. It have no doubt of its exceeding a stances, I have no doub

at almost any time of the year in all its different stages. This is owing to the fact that the female continues to deposit her eggs Editor Massachusetts Ploughman.

RESOURCES OF TEXAS. LETTER NUMBER III.

EVERGREEN, Harris Count. Texas, April 16, 1877.

EDWARD ATKINSON, Esq. Dear Sir: In a former letter I stated Dear Sir: In a former letter I stated in general terms that there is a large belt of for expressing sorghum. This is the chief ing crop, with an additional breadth for corn,

and any former variance of the same with the expenses preliminary and province and under it and made no growth for several days. The season was intensely dry, only two light showers falling from planting to havesting.

The seed was a new variety originated by planting seed taken from the small naked ears sometimes found on the extreme tops or blossom branches. The kind used was guar district; but I am careful not to exceed the earliest of over 500 new varieties so

were not without effect. Had 40 bushels of wood ashes been sown over the ground after planting, the crop would have been greatly increased. Corn is a gross feeder and will utilize about all the manure within reach. Cheap corn can be grown only on rich soil. With a proper variety, a rich soil, proper culture, and a favorable season, I cannot see why the crop cannot be run up to 250 bushels shelled corn per acre; it would not be three pounds to the source variety and it seems it in other words there are only half the word.

attached to the centre roller. The necessary building, in wood, may be put down any where between \$200 and \$1000, according to the means or fancy of the farmer. To omit nothing, I add Juice Boxes, Copper Skimmer, Dipper and Saccharometer, all failing within..... Next I submit an estimate of the usual

atrifugal apparatus, vacuum pans costing structive. A good deal of mystery was in thousands, steam engines with their con- former years thrown by professional sugar omitant expenses, were deemed indispensa- boilers around their craft; they affected to ble in the programme of operations. The keep their skill as a great secret and very simple, inexpensive appliances for making difficult to acquire, even under instrucsyrup from sorghum adopted in the Western | tion. A few principles are very important; States, seem to have suggested the use of with these observed, the process is a very early the same appliances for making sugar simple one and easily acquired. It is less from the Southern cane. The mill for ex- difficult than to learn to make domestic soap.

I now proceed to set forth an estimate of occurs to me that I should meet an objective, was foaled Sept. 19th, 1855. His

WINTHROP MORRILL. Winthrop Merrill was got by Young Morrill, a horse well known to all American orsemen. Some of his get were fast and leservedly noted trotters. Hiram Woodruff, Drace, and Fearmaught, his noted sons (if the latter was by him) were among the fast est of their time. Winthrop Morrill was

considered a rapid trotter when a colt, but was incapacitated for the turf, and little is generally known of him till brought into otice by the public performances of Uncle Abe, with a record of 2.27, and Ben Morrill, winning a four year old record of 2.32 3-4 making the last half, in 1.13 3-4. Honest Harry, another of his get came to the wire in 2.24 1-2, trotting a half in 1.10. This time was afterward changed to 2.25, without any public explanation. J. G. Morrill, a three year old, trotted in 2.50, a half in 1.21 He has a large number that have trotted in

s Winthrop Morrill by getting superior trotters and roadsters are very rarely found. He is compact, strongly muscled with plenty f bone substance, having great courage and an elastic movement; with these marked characteristics it is not surprising that his progeny inherit qualities that have made them favorites on the turf, and sought after as no other family in New England, for entlemens' driving horses. The more empact and strongly muscled the greater the endurance. Horses for service as roadsters and for turf purposes, whether trotting r running, standing from 15 to 15 1-2 hands; and weighing from 900 to 1000 pounds are less liable to break down when everely taxed than larger animals. By far the greater number of winners have come 15 1-2 hands, Dexter 15 1-4, Flora Temple 14 1-2. Goldsmith Maid 15 1-4. The famous Lady Thorne, 16 1-2 hands, Gloster 16 1-2 and Great Eastern 17 1-2 are exceptions.

In large animals the thickness of the bone the length of limb. They have not the same proportional strength that the smaller ani draw from 70 to 80 times his weight, while a horse can scarcely draw three times his own weight. Tall, flabby animals, are unfitted for heavy draft, or for very extended drives

at light weights even. Winthrop Morrill is a mahogany ba 15 1-2 hands high and weighs 1050 pounds. Morgan Eagle, 3d dam by Bulrush Morgan 4th dam by Old Carson, by Royal Morgan, known also as the Steele, and Crane horse and in Maine as Morgan Rattler; his des cendants have splendid dispositions, fine cut heads, thin deep chests, oblique shoulders large broad hips, giving marked propelling power, and courage like a thoroughbred t carry them at their best speed through the

most extended race. His first issue were from ordinary cold blooded mares. His owner, Mr. Thomas Williams, has bred him to the finest stock in the country, including Hambletonians' Mel bourne, Toronto Chief, Young America, must produce still more rapid trotters, if as increase of trotting blood mingled with that of Messenger, Morgan and Henry which to do with propagation of speed. We re cently made a visit to Mr. Williams' stables and found the old patriarch of trotters in his box, the picture of health, having the fire of youth in his eye, and evincing by every movement that his natural force was un abated. Eight years ago we were induced by his owner, Mr. Jackson, (of Winthrop, Maine,) to sit behind him, and was then fully convinced of his superiority to any stock horse in the State. We had driven one of the best mares in New England two days, having started for Vassalboro, inaking sugar. Hitherto a prompt and comtending to have her stinted to Gen. Knox A ride behind Winthrop Morrill, and a day spent in examining his colts, brought our journey to a close. Instead of a Knox colt. we had the next spring a Morrill, and have never regretted the change. H. L. W.

STATE OF MAINE.

Readquarters New England Agricultural Society.

No. 45 Milk Street, Boston, May 28d, 1877.

To Farmers. Mechanics, Arisans and all other Persons Interested in the Exhibition of the New England Agricultural Society for the year 1877:

The New England Agricultural Society for the year 1877:

The New England Agricultural Society, by which a joint spected an arrangement with the Maine perfected an arrangement with the Maine State Agricultural Society, by which a joint State Agricultural Society State State Agricultural Society State ty of Portland, Maine, Monday, Lucsday, we come ty of Portland, Maine, Monday, Lucsday, we come the his crops, it would seem as if a grand festi- he was going for he could hold out no Sound boats. noon, on Monday, Sept. 3d, and close on the afternoon actors. The other callings have their stated shortly ceased to breathe. Such buildings easons why farmers should indulge in theirs. civilisation.

At Portland will be brought together into a single view, besides the choicest products . which New England agriculture can present, extended agricultural community. They subsided and taken a clearly pacific form. will be richly worth meeting and mingling The two very recent speeches of Lords he is legion. will be richly worth meeting and minging with. The influence of such an interview with. The influence of such an interview Derby and Salisbury, both Cabinet Ministhis country number a thousand working organities and the former Minister for Foreign will be felt for the next year. The memory of it will not cease to yield its secret delight till the time returns for its repetition. One such gathering each year works wonderful results in annihilating the distance that separates the cultivators of New England, in the time returns of New England, in the time returns of New England, in the time returns for its repetition. One sense significant of the tone of the Government, and as such are of the first current interest. It was at a banquet in London that they spoke. Lord Salisbury said he term Minister for Foreign sations and over a hundred thousand members.

—The Russian army began its march of insuch that work yet.

—There is a famine in China, and hundreds of thousands are said to be starving.

—There is a famine in China, and hundreds of thousands are said to be starving.

—Admiral Porter says he doesn't put so much the objects of the Great Fair.

THE FASHION OF ECONOMY. The signs abound that the new fashion is

one of the best of the old ones revived. It may be necessity rather than choice that has them at any cost. Lord Derby entirely cofact that the era of extravagance and lavishness is ended. Henceforth we must all
begin after the method followed so safely
and with such substantial results by an older
generation. A good many of the storekeepers and persons of other occupations are
finding out by experience that the way to
secure patronage is to drop prices at once,
for those who do it earliest are sure of getting the first favors of the public. This four
years discipline has taught us many things
which as a people we did not know before;
one of which is that we need expect to
accomplish nothing except by industry, perseverance, and thrift. A European would
severance, and thrift. A European would
severance, and thrift. A European would

them at any cost. Lord Derby entirely coincided with these remarks, and asserted
that the greatest of all British interests is
that the greatest of all British interests is
the interest of peace.

Monroe sold 30 steers, averaging 1200 lbs, at 7dc, live; 20 steers, averaging 1200 lbs, at 6dc; 78 steers, averaging 1056 lbs, at 6dc; 12 steers, averaging 1100 lbs, at 6dc; 10 steers, averaging 1100 lbs, at 6dc; 20 steers, averaging 1200 lbs, at 87.40; 18 steers, averaging 1200 lbs, at 7d; 50 steers, averaging 1200 lbs, at 87.30 lf cwt; 17 steers, averaging 1200 lbs, at 7d; 50 steers, averaging 1200 lbs, at 7d; 50 steers, averaging 1200 lbs, at 87.30 lf cwt; 17 steers, averaging 1200 lbs, at 87.40 lbs, at 6dc; 28 steers, 27.470 lbs, at 6dc; 6 steers, 5,780 lbs, at 6dc.

S. F. Woodbridge sold 16 steers, 20,460 lbs, at 7dc; 10 steers, 11,800 lbs, at 87.40.

E. Farrell sold 10 steers, 12,600 lbs, at 7dc; 7 steers, 7,420 lbs, at 6dc; 18 steers, 19,100 lbs, at 86.90.

SALES AT OLD YARDS.

More than 5000 head of Western sheep and nearly 1000 from the North which, with the yeal aid the eatire length of calves that go with sheep and the meats generally, sold in the same stalls make a full supply. Northern dealers expected a rise on their flocks this week; all the changes were little quicker sales; not much doing in sheep from the North until the last of August. Berry Long had a good flock that arrived early, and sold as his

rions ruling prices. But we look upon it as temporary and of short duration. We do not increase our values above those of last week, for the business was mainly done at prices within the range. We quote: Premium # _______________________ extra \$6 25 (36 70; first quality \$5 75/26 25; second quality \$5 0665 75; third quality \$5 25/65 50; inferior \$4 50/66 50; Cattle Mankets.

4 50@5 25. Milch Cows.—The receipts num yard for sale. A few were taken by farm milkmen. We quote common to fair, 50 00, and fair to good \$50 000660 00.

Sheep and Lambs.—The market dull with a very limited Easternand local and continued droop until Wednesd prices were quotably long the first of close of last week. We quote as the pring: Common to fine 4644c, fine to go of the first of the fir

WONDERFUL

Piles. Hemorrhoids.

PILON.

Many causes tend to produce this painful and distressing state. The blood is retarded in its re turn; the too frequent use of drastic purgatives tends to produce congestion of the bowels, torpid action of the liver, and numerous other causes are the source of this complaint, and hith erto nothing effectual has been presented to the public, which would rapidly alleviate symptoms and ultimately prove an effective cure. In PILON we have a remedy which not only acts almost ides the blood, instantly, but will remove the is largest tumors of the parts (Piles an operation, and removing it or This remedy has been hailed with delight, and is now prescribed by many practising physicians, who are cognizant of its merits, as the only known sure cure for PILES.

ANY ARDOR. MCC., April 30, 1875.

DR. RADWAY—Aind Sir. I have been taking "TO.

Resolvent, Regulating Pilis, and also using the steady Relief about see year for ovarian tumors of the abdomen which the most eminent physicians of our Medical College prenounced incurable.

They were like knots on a tree. When I was sitting in a chair they bung almost to the floor, and my weight was two hundred and seventy-five pounds, when I commenced with your remedies, and now it is two hundred and ten pounds, but they are not all gone yet. I have taken twenty-four bottles of Resolvent, nine of Relief, and twenty-four boxes of Pilis. I got the medicine from G. Grenvill.

Please send me your book False and True.

MRS. C. Krapf. Another Letter from Mrs. C. Krupf.

Dn. Radwax—Kind Sir: I take the liberty to address you again. My health is greatly improved by the use of your medicines. Three of the tumors are entirely gone, and the fourth is nearly so. Dropsy is gone, health still improving, and my weight decreasing very fast. I have had a great many calls this summer to enquire of the wonderful cure your medicines has done for me, one from Ohio, one from Canada, three from Jackson, and quite a number from this place. Yours with respect, Mas. C. Krapp.

Wasser all carries of the Skin. Will destroy Lice, Ticks,

OF TEN YEARS' GROWTH CURED BY RADWAY'S REMEDIES.

Ovaries and Bowels for Ten Years.

DB. Radway: That others may be benefitted, I make this statement:

Thave bad an Ovarian Tumor in the ovaries and bowels for ten years. I tried the best physicians of this place and others without any benefit. It was growing at such rapidity that I could not have lived much longer. A friend of mine induced me to try Radway's Remedies. I had not much faith in them, but finally, after much deliberation, I tried them.

I purchased six bottles of the Resolvent, two boxes of the Resolvent, were gone. I had lost twenty-five pounds.

I continued to use the medicine until I was sure that I was entirely cured. I took the medicine about five months, and during that time lost forty-five pounds. In all I took three dozen bottles fof the Resolvent, six bottles Relief and six boxes of the Resolvent, six bottles Relief and six boxes of the Pills.

I feel perfectly well, and my heart is full of gratitude to God for this help in my deep affliction. To you, sir, and your wonderful medicine, I feel deeply indebted, and my prayer is that it may be as much of a blessing to others as it has been to medicine. I feel deeply indebted, and my prayer is that it may be as much of a blessing to others as it has been to what was sent to hear by you. I may say that her statement is correst without a qualification.

(Signed)

E. S. LEACH, Druggist and Chemist, Ama Aftor, Mich.

This may certify that Mrs. Bibbins, who makes the above certificate, is and has been for what was sent to keep by you. I may say that her statement is correst without a qualification.

(Signed)

E. B. FOND.
